Information on Abstract Submission Format and Content

Structure is as follows:

- Abstract submission category
- Abstract title
- Author names
- Author affiliations
- Content (background, objective, methods, results, conclusions)

The abstract maximum is **250 words (not including abstract title).**

Consistency in author names is required.

1. Order: First Name Last Name
2. Please do not include middle names or middle initials
3. Please capitalize the first letter of the First Name and first letter of the Last Name

**Missing/incomplete details will not be queried and will be published as-is.*

Submitters are required to submit the edited abstract in MS Word format (.DOC or .DOCX). A detailed summary of the abstract or full plain text version is also required to be entered or pasted into the appropriate submission field.

Authors are requested to use the Vancouver citation style. Place citations as numbers in square brackets in the text. All publications cited in the text should be presented in a list of references at the end of the manuscript. List the references in the order in which they appear in the text. Only articles published or accepted for publication should be listed in the reference list. We discourage textual references to unpublished and unavailable data. With permission, the author can reference a personal communication with name in the discussion section. If an article has a DOI, this should be provided after the page number details. The number is added after the letters 'doi'. Manuscripts will not be considered if they do not conform to the Vancouver citation guidelines.

Please **DO NOT INCLUDE** tables, figures, supplementary material, or graphics in your abstract

submission. Tables, figures, supplementary materials, and additional graphics may be included in your poster, should it be accepted.

Submission Topic

- Please allocate your abstract to one of the following topics:
    - Animal Models
    - Basic Science
    - Biomarkers
    - Case Studies
    - Cognitive Aspects of HD
    - Community Impact
    - Epidemiology
    - Genetics
    - Imaging
    - Interventional Studies
    - Neurobehavioral and Non-Motor Symptoms
    - Novel Therapies
    - Pathogenesis
    - Phenocopies and Phenotypic Variation
    - Other _____

Editing

- Abstracts will not undergo copyediting.
- Obvious mistakes will be corrected, and the abstracts will be amended to house style as appropriate.

Notification of accepted Abstracts and poster presentations

- All abstract posters will be reviewed by a review team; those that are accepted will be provided with poster space onsite at the conference and will be published in the *Journal of Huntington's Disease*. If a late-breaking abstract period opens, any of those submitted abstracts will not be eligible for publication. You will be notified by early August whether your abstract has been accepted for exhibition and publication or not.
- Particularly good abstracts will be considered for a brief oral platform presentation live at the congress. Industry posters are not eligible for oral platform presentations.
